PROFILE SUMMARY

Frontend Product Developer with 3 years of experience building scalable web applications using React, Next.js, TypeScript, Redux Toolkit, and Node.js. Experienced in **developing enterprise workflows**, AI-powered features, reusable **component libraries**, and high-performance user interfaces. Open to relocations.

PROFESSIONAL EXPERIENCE

W2S Solutions

Mar 2025 – Present | Chennai, India

(Frontend Engineer)

UAE Insurance Claim & Quote Creation Platform

- **Workflow Orchestration:** Developed **Quote Creation** and **Insurance Claim** journeys by implementing dynamic forms, business validations, and Redux Toolkit state management.
- **Interactive SVG Engine:** Maintained and enhanced a reusable SVG-based 2D vehicle damage assessment engine for claim annotation and damage mapping.
- **Component Architecture:** Designed reusable React components, integrated REST APIs, and optimized frontend performance through modular architecture.

Adam Technologies

May 2024 – Apr 2025 | Chennai, India

(Product Developer)

- **AI Conversational Experience:** Developed AI chat interfaces with real-time streaming responses and LLM integration for **JeeBuddy AI**.
- **Dental CRM Platform:** Built payment workflows, AI-powered features, and business modules for an AI-driven dental practice management system.
- **Frontend Engineering:** Built scalable, reusable React and Next.js applications by integrating REST APIs, authentication, and third-party services, ensuring maintainable architecture and high-performance user experiences.

Dusol Technologies

Apr 2023 – May 2024 | Chennai, India

(React frontend developer)

- **CMS Development:** Developed and maintained the company's Content Management System using React and REST APIs.
- **Feature Development:** Implemented new features and enhanced existing modules based on business requirements.
- **Component Development:** Built reusable React components to improve UI consistency and maintainability.
- **Production Support:** Resolved production issues, fixed bugs, and improved application responsiveness.

PROJECTS

Polaris AI IDE

• Next.js · React 19 · TypeScript · OpenRouter

- Built an **AI-powered browser IDE** with **multi-file code generation**, AI chat, and **OpenRouter** model orchestration.
- Implemented **CodeMirror editing, virtual file management**, live preview, and AI-assisted development workflows.

Onboard Map CLI

• *Node.js · TypeScript · ts-morph · Express*

- Developed a codebase intelligence platform that visualizes **dependency graphs** and identifies architectural risks through TypeScript **AST parsing and Git analytics**.
- Engineered dual CLI and web interfaces with workspace detection, security auditing, health scoring, and **automated Markdown/JSON report generation**.

Interactive Car Parts Library

• *React · TypeScript · SVG · Vite · Material UI*

- **Developed** a reusable React **component library for interactive SVG**-based vehicle part selection with i18n, and customizable theming.
- Implemented screenshot export, persistent selection state, and published the library as an npm package for seamless integration.

OPEN SOURCE contribution (Appwrite)

- Contributed frontend UI improvements, Collaborated with the open-source community using GitHub workflows

SKILLS

Frontend: Next.js, React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, Tailwind CSS, Material UI

State & Data: Redux Toolkit, TanStack Query.

Backend & Cloud: Node.js, Express.js, Prisma ORM, JWT, OAuth, AWS S3.

Build & Tooling: Vite, Webpack, Babel, Git, GitHub, Docker, GitHub Actions

Testing & Quality: Lighthouse, Storybook, Web Vitals, Accessibility (WCAG)

Tools: Postman, Figma.

EDUCATION

Bachelor of Engineering (B.E.) — Mechatronics Engineering

2016 – 2020

Agni College of Technology
